Professional Summary

Detail-oriented and dedicated software developer with strong experience in C, C++, and C#. Skilled in building efficient console applications, solving complex programming problems, and adapting quickly to new technologies. Proven ability to work independently through freelance projects, delivering reliable, clean, and maintainable code. Motivated to grow, learn, and contribute to impactful software solutions..

Education

Bachelor of Science in Computer Science

Assiut University – Faculty of Computers and Information

Expected Graduation: 2028

Relevant coursework: Computer Networks, Operating Systems, Data Structures, Algorithms.

Experience

Freelance Software Developer

2022 – Present

Developed multiple console applications using C, C++, and C# for clients.

Delivered clean, optimized, and maintainable code within deadlines.

Communicated effectively with clients to gather requirements and provide technical guidance.

Solved complex logic issues and improved application performance.

Projects

- TryHackMe Labs – Completed rooms on network security, Linux privilege escalation, and web vulnerabilities.
 - C++ Algorithm Projects – Developed multiple CLI applications targeting data structure challenges.
 - Python Security Automation Tools – Created scripts to automate Nmap scans and vulnerability checks.
 - Packet Sniffer (Python & Scapy) – Captured and analyzed packets in LAN environments.
 - Task Manager (C#) – Console-based app for task management with file I/O and sorting features.
 - SOC Simulation Lab – Emulated SOC alerts and triage scenarios using open-source tools.
 - IR Sensor People Counter – Hardware project using IR sensors and 7-segment display.
-

Technical Skills

- Languages: C, C++, C#, Python
 - Networking: TCP/IP, OSI Model, VPNs, Firewalls
 - Platforms: Linux CLI, VirtualBox, Git, Docker (Basic)
 - Soft Skills: Communication, Problem Solving, Adaptability, Time Management
-

Certifications & Courses

- Operating Systems – Cisco (2025)
 - Python Course – freeCodeCamp (2025)
 - C# Course – freeCodeCamp (2025)
 - Google IT Support (Basics) – (In Progress)
-

Languages

- Arabic – Native
- English – Good (Written & Spoken)
